

## COSHH ASSESSMENT & HAZARD SUMMARY SHEET

Substance / Trade Name:

**White Spirit**

**Activity / Conditions of Use:** For thinning paint, degreasing and brush maintenance. Do not use to thin oil-based paints. Product is water-based and will not work.

**Quantities Used:** Various

**Assessment of Risk:** Minimal as this is a non-hazardous product.

**Recommended Control Measures:** Wear gloves and glasses to reduce the risk of adverse effects as far as possible.

**Spillage Management:** To prevent release, place container with damaged side up. Take care as floors and other surfaces may become slippery. Flush spilled material into an effluent treatment plant, or proceed as follows. Collect spillage or reclamation or absorb in vermiculite, dry sand or similar material. Flush contaminated area with plenty of water. Discharge of small quantities to the sewer with plenty of water may be permitted. The requirements of the local water authority must be complied with if contaminated water is flushed directly into sewer

**Disposal:** Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Dispose of waste product or used containers in accordance with local regulations. Waste should be treated as controlled waste. Waste packaging should be collected for reuse or recycling.

This risk assessment applies only to this substance when encountered or used in the activity and / or conditions described above. If there is a change in the activity or conditions in which the substance is encountered or used, a new assessment must be made.
